

## **BoMilch Starter Milk Powder Premium Milk Powder for Piglets and Calves**

**BoMilch Starter Milk Powder** is a high-quality milk powder developed for young animals during their most critical growth phase. In the first weeks of life, piglets and calves depend strongly on easily digestible energy and highly available nutrients.

BoMilch provides a balanced blend of milk components, essential minerals and amino acids, supporting a smooth nutritional transition and an optimal early start. Thanks to its excellent solubility and high palatability, BoMilch is ideal for both liquid feeding applications and starter feed formulations.

### **Key Nutritional & Functional Benefits**

BoMilch Starter Milk Powder offers multiple performance advantages:

- High lactose content for fast energy supply (**459 g/kg**)
- Highly palatable, stimulating early feed intake
- Excellent solubility ensuring easy preparation and homogeneous mixing
- Supports gut development and digestive stability in young animals
- Balanced nutritional profile for strong early growth
- Suitable for piglets around weaning and calves during rearing programs

### **High Lactose for Rapid Energy and Vitality**

With a lactose level of approximately **459 g/kg**, BoMilch delivers quickly available energy that is essential for early vitality and growth performance. Lactose also contributes to a stable gut flora, supporting healthy digestion and nutrient absorption during the sensitive first weeks of life.

### **Excellent Solubility and Easy Application**

A major practical advantage of BoMilch is its very good solubility. This ensures:

- Consistent mixing in milk feeding systems
- Smooth application in automated or manual feeding setups
- Reliable integration into compound feed concepts

Its high palatability further improves intake, helping young animals start feeding quickly and efficiently.

### **Supports Feed Intake and Gut Development**

Young animals have an immature digestive system and require highly digestible nutrients. BoMilch combines easily digestible sugars, fats and proteins to promote steady nutrient uptake.

# CROPENTA

This results in:

- Improved early growth
- Reduced stress during weaning transitions
- Stronger foundations for later performance

## Applications in Young Animal Nutrition

BoMilch Starter Milk Powder can be flexibly applied depending on feeding strategy:

- Piglet nutrition around weaning
- Calf milk feeding programs during rearing
- Starter feed supplementation for additional energy
- Situations where intake stimulation is required

Feeding recommendations can be adjusted according to the animal's needs and production targets.

## Composition

- Milk powder-based nutritional blend

## Benefits Summary (Highlight Block)

- Premium milk powder for piglets and calves
- Very high lactose content for fast energy supply
- Excellent solubility and easy application
- Highly palatable to stimulate early intake
- Supports gut development and healthy early growth
- Ideal during weaning and rearing phases

## Shelf Life & Storage

- Several months under dry storage conditions
- Store in a cool, dry and well-ventilated environment

## Product Positioning

**BoMilch Starter Milk Powder** is the ideal solution for feed and milk replacer manufacturers seeking a premium, highly digestible milk ingredient that combines:

- Rapid energy delivery
- Excellent palatability
- Gut-supporting nutritional properties
- Broad applicability for piglets and calves

A powerful starter nutrition ingredient for optimal early-life performance.
